

How do I fix WiFi on Windows 10? Remove and reinstall Wireless Drivers in Windows 10

1. Press Windows key + X and click on Device Manager.
2. Right-click on the network adapter and choose Uninstall.
3. If prompted, click on Delete the driver software for this device.
4. Restart your machine and Windows will automatically reinstall the driver.
5. Try connecting using the SSID available.

You will use your MCC Credentials to login. By logging in you are accepting [MCC Terms of Use Policy](#) .

Click OK.

If you are not redirected, try closing your browser and opening it back.

A login page will open in a new browser window. If not, try opening google chrome.

If you still can't connect please start a support ticket with us.
