

# How to Connect to the MCC VPN

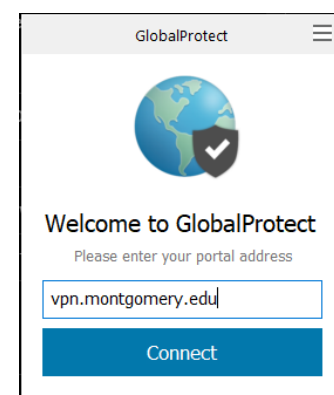

## Connect to the VPN from your personal laptop or PC

1. From your web browser go to <https://vpn.montgomery.edu/global-protect/login.esp>
2. When prompted, log into the portal with your MCC user name and password.
3. Select the Download Windows or Mac version of your personal device. Please note that if your personal device is running Windows that you will need to know if your Operating System is 32 or 64 bit.
4. Once the application has been installed on your personal device, follow the instruction for connecting to the VPN.

## Connect to the VPN from your laptop or PC

1. Select the “up arrow” located in the bottom right taskbar of your screen.
2. Select the GlobalProtect gray Earth icon.
3. The GlobalProtect application will open.
4. Type [vpn.montgomery.edu](https://vpn.montgomery.edu) in the portal address field.
5. Select the blue “Connect” button.
6. Once the app connects, you will be prompted to enter your login credentials.
7. Then select the blue “Sign In” button.
8. Once the app shows you are “Connected”, you will be able to access Colleague, Informer, or Etrieve.
9. Once you are completed, please disconnect from the GlobalProtect VPN app by selecting the gray “Disconnect” button on the app screen.

## How to Connect to the MCC VPN

### Connect to the VPN from your phone

1. From your phone, open the store app you use to download apps to your device. For example, iPhone uses the App Store and Android uses the Google Play Store.
2. From the search bar, type and search for GlobalProtect.
3. Select the GlobalProtect Palo Alto Networks app and install.
4. After the Global Protect app is installed, open the app and the portal address. [vpn.montgomery.edu](https://vpn.montgomery.edu)
5. Sign in using your login credentials.
6. Select "OK" when prompted by the connection request.
7. Once connected, you will be able to access Etrieve.
8. Once completed, please tap the disconnect button from the GlobalProtect app.
